

Installation:

The Acoustic Guitar Collection download contains both Akai S-5000 and Kontakt 2 formats, both of which use the same sample pool. The Akai S-5000 instruments are located in the sample folder of each instrument's folder for easier loading.

For CD-rom use, just burn a CD-rom of the entire AGC folder, then load as usual from your sampler's CD-rom drive.

For Aksys, just drag any instrument's folder onto the "Memory" icon in the Aksys browser

The Guitars

A Guild JF30 ("Nashville"), a 1955 Martin D-28 ("Blue Ridge"), a Taylor 410 ("California"), and a Sivlertone ("NylonTone") were sampled to create these instruments. With the exception of the NylonTone, each guitar has fingerpicked and picked versions.

Instrument List Abbreviations

NSH= Nashville
BLR=Blue Ridge
CLF=California
FN=Fingerpicked
PK=Picked

SLD= Slide samples at higher velocities with mute and harmonic layers also.

FUL= 2 sustain velocity zones with mutes and harmonics.

SNGL= Just mutes and sustains.

LT= Lite. Fewer keygroups.

The Strums Instrument

The "Strums" instrument features sampled up and down strokes arranged for easy playing. Just rock back and forth between the up and down strokes in adjacent octaves while using the sustain pedal.

Special thanks to those who helped make this product a reality. To Norman Lee, Randy Harris, and Ray Valla for the use of their great guitars. Special thanks to Greg Doles for use of his various handy audio devices. My wife Brenda, who was patient through whole year-long process and has become quite the audio editor in her own right.

The samples and programming on the Indiginus Acoustic Guitar Collection the property of Indiginus and are licenced (not sold) for use in music productions only. Any unauthorized copying, selling, lending, or re-distribution of it's contents in ANY WAY is expressly forbidden. This includes use of these samples in any other sample library. Indiginus Instruments DOES authorize copying and/or modifying of the samples and programs in the user's (licencee) own sampling system and storage devices. This is for the convenience of the user only.

The Acoustic Guitar Collection is licenced as is. We have created a product that we believe sounds great and plays well, but we cannot guarantee that it will fulfill any particular expectation on the part of the end user. It has been tested on several systems and has funtioned properly. If you believe that the CD-ROM is defective please contact us.
