

Sample Library for Kontakt 2-3 and Akai S5000 samplers.

Solid State Symphony is a virtual orchestra library created using analogue synthesizers. The instrument or orchestral section sounds can be played individually, or in velocity-switched instruments like "Full Orchestra", "Synfonia", or "Outer Rim". Although not a replacement for a sampled orchestral library, Solid State Symphony has a character all its own, and is a great composing tool, as well as a supplement to other orchestral libraries.

Installation

Kontakt 2-3

Just drag the SolidStateSymph folder to your sample drive, or wherever the rest of your sample library resides. Then load as usual using Kontakt's file Browser.

Akai S-5000/6000

The Akai S-5000 programs reside with the samples in each category's sample folder. This is necessary because of the way Akai samplers load instruments. If you're using a CD-rom drive, just burn a CD-rom of the SolidStateSymph folder. Or just copy to a hard drive and load via USB using Aksys, if your sampler has the USB option installed. The Akai S5000 instrument list begins on page 6 of this document.

Solid State Symphony is organized into several folders:

Full Orchestra

Full Orchestra is a velocity-switched instrument containing each of the virtual sections with level controls for each, as well as a reverb return level control.

Strings

Orch Strings (pictured above)

3 layers with level controls for each, as well as chorus, phaser, and reverb level controls.

Orch Strings Expressive

Slower attack on Syncerto layer.

Orch Strings Soft

Analogue synth string sound with effects controls.

Syncerto

Analogue synth approximation of chamber strings. With effects controls.

String Attack

The name says it all.

Harp

Analogue synth harp sound.

Brass

Brass Ensemble Vel (above)

3 layers with level controls. Velocity-switched mp/ff layers.

Brass Ensemble Mod Wheel

Same as above, except that the ff layers are controlled by the mod wheel.

Brass (cont)

Brass Ens 2 Vel

*The output of a multi-layer brass ensemble sound was resampled to reduce processor load.
2 velocity layers.*

Brass Ens 2 mp

Just one velocity layer.

Fr Horn Ens Stereo

Fr Horn Ens Mono

Fr Horn Solo

Solo Trumpet

Trumpets/Trombones Mod

Mod wheel controls ff layer.

Trumpets/Trombones Vel

Velocity-switched layers.

Trumpets/Trombones mf

Trumpets/Trombones ff Mod

Mod wheel controls filter cutoff.

Trumpets/Trombones 2 ff Mod

Same as above, but with a slightly different trumpet patch.

TrumpHorn

Imp 3 Trumpet

"Imp" stands for "Impression". Uses auto-pan.

Woodwinds

Woodwind Section

Bassoon

Clarinet Mod VB

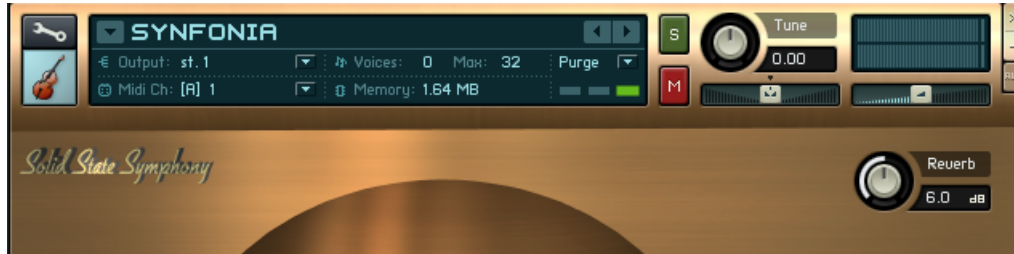

Oboe VB

Solo Flute

Warp Flute

Orbit Horn

Synfonia

The Synfonia folder contains re-sampled versions of the Full Orchestra. The result is an orchestral synth pad that is surprisingly detailed. Great for sketching out themes.

Synfonia

One layer orchestral pad.

Orchestral Pad

Velocity-switched mp/mf layers.

Synfonia Orch

Combines Synfonia and Orchestral Pad into one instrument. Velocity-switched.

Synfonia Orch Mod

Same as above except that the Mod wheel controls the layers

Akai S5000/6000 Instrument List

Note: The Akai S5000/6000 instruments are located in the sample folders.

Full Orchestra (layered keygroups)

- Full Orchestra
- Full Orch Lt 1
- Full Orch Lt 2
- Full Orch Lt 3

Synfonia

- Orch Pad Vel
- Orch Pad Vel Lt 1
- Orch Pad Vel Lt 2
- Orch Pad Vel Lt 3
- Orch Pad f
- Orch Pad p
- Synfonia
- Synfonia Lt
- Synfonia Orch
- Synfonia Orch Lt

LFO Effects (using the S5/6k's syncable LFOs)

Multis:

- LFO System 1
- LFO System 2
- LFO System 3
- LFO System 4

Instruments:

- LFO Bass 1
- LFO MJ 9 8th
- LFO MJ 9 Qtr
- LFO Oct 16th
- LFO Oct 16th 2
- LFO Oct 8th
- LFO Oct 8th 2

Effects

- Descent
- Windscape

Brass

- Brass Ensemble 1 (layered keygroups)
- Brass Ens 2 Vel (resampled)
- Brass Ens 2 Vel Lt 1
- Brass Ens 2 Vel Lt 2
- Brass Ens 2 Vel Lt 3
- Brass Ens 2 f
- Brass Ens 2 mp
